<b>1</b>	<b>Quality policy</b> .....	<b>1</b>
<b>2</b>	<b>Environmental policy</b> .....	<b>1</b>

**1 Quality Policy**

The products we supply will meet our customers defined and implied requirements when it comes to safety, reliability, functionality and value for money as well as applicable laws and regulations stipulated by authorities.

The products should be delivered in the correct quantity and within an agreed delivery time.

Within VBG Truck Equipment the principal of zero-defects will be valid and should be reached by preventive measures and continuous improvements in all functions/processes.

**2 Environmental Policy**

VBG Truck Equipment, which is part of the truck and trailer industry, will protect the external as well as the internal environment.

Our activities in new as well as existing processes/products will lead to a reduction of the environmental impact. This will be reached through utilization of resources in a structured way, which will result in the prevention of contaminations and continuous improvements with state-of-the-art technology.

The activities will be carried out so as:

- applicable regulations will be properly fulfilled, material and energy are utilized to reduce the environmental impact and noise levels are minimized.
- all employees have the knowledge of its and the company's environmental impact.
- environmental aspects, with regards to the product's life-cycle, are taken into consideration.
- environmental aspects is one of the criteria when selecting and evaluating suppliers.
- activity and contingency plans will be continuously updated and enforced to reduce/avoid effects of potential environmental incidents.
